

Day 15 - Biology - 9-17-24 to 9-18-24

HOMEWORK – Populations

Populations

- Population: a group of organisms of the same species that live within a given area
- Key characteristics:
 - Growth Rate
 - Population density
 - Dispersal Patterns
 - Life-History Patterns

Ostriches are nomadic, wandering in small groups.

Aspen trees are quick to pioneer areas that have been disturbed by fire.

Population dynamics

The diagram illustrates population dynamics with a central population of birds on a branch. Births (green arrow) and immigration (green arrow) add individuals to the population. Deaths (yellow arrow) and emigration (yellow arrow) remove individuals from the population.

1) Complete the **Outline/Read** assignment

2) Finish the **Video Notes**.

Submit on Schoology as soon as completed.
